SHA-256-SUMS for Arch Linux GUI ISOs.

This file contains the sha256sums for the various Arch Linux GUI ISOs. Please verify your downloads with these.

How to verify checksum?

Step1:

- 1] On Linux, open terminal in the Downloads folder or wherever the ISO is and type
`sha256sum iso-name.iso`
- 2] On Windows, open powershell in the Downloads folder or wherever the ISO is and type
`certutil -hashfile iso-name.iso sha256`
- 3] On MacOS, open terminal in the Downloads folder or wherever the ISO is and type
`shasum -a 256 iso-name.iso`

Step2:

In all the above cases, if the returned value matches with the sha256sum given below, your download is authentic.

Note:

Please refer to the convention below. sha256sum is the long alphanumeric string, on the left.

iso-name refer to the name of the ISO. It should contain the .iso extension.

DOB stands for date of build. It has nothing to do with the verification process.

It's just there for reference.

Convention:

DOB	sha256sum	iso-name
DD/MM/YY		
23/06/21	04aae2e95c6c6f324504c18f377034869032fe049b98e5f361997853116bfd2f	archlinux-gui-zen-2021.06-x86_64.iso
